

hear it again for the first time...

The future of sound has arrived

QUANTUMPHONIC™ SOUND DELIVERY SYSTEM

CLARITY • RESONANCE • DISTANCE

QuantumPhonic presents a never-before-seen emotional and physical experience. A sound that is neither too loud nor too soft to members of the audience in every part of your venue. The person sitting a couple of inches from the speaker will hear virtually the same quality and clarity of sound as someone 175 feet away.

QuantumPhonic sound, in addition to enhancing the experience of hearing, also adds unseen dimensions to video and the overall comfort of the environment. The result: the audience is totally immersed in the QuantumPhonic experience making them return for more.

QuantumPhonic Sound Delivery System is a versatile hybrid system that is a revolution in the audio industry. From auditoriums, entertainment clubs and complexes to movie theaters, seminars and presentations, churches, media rooms and large public assembly points like airports, malls, casinos and hotels - QuantumPhonic sound can be effectively customized to meet your needs and significantly enhance the quality of your sound.

Ask one of our representatives for a demonstration in your facility.
